Department of the Air Force
Attn: AFCIN - UFOB's
The Pentagon
Washington, D. C.

Gentlemen:

On the morning of 15 April 1966 at 5:00 a. m. I noted through my picture window a very bright shining object in the sky which I will attempt to describe. It was almost parallel to the moon and a great distance apart but in contrast seemed much larger than the moon and glowed very brightly in a fire-like brilliance. It did not seem to move but hovered in a stationary position for several minutes. (Upon seeing this, I wanted to confirm it by someone else so I awakened my husband, [REDACTED] who also watched this object with me.) While we watched it, the object changed shapes, but still appeared in an almost stationary position. After about 15 minutes, it appeared to be assuming altitude, moving slowly upward and at a slight angle in the East. We watched the object move completely out of sight which was 30 minutes from the time we first saw it. (We are attaching a drawing of the way this object appeared to us at first and the different stages as it changed shapes.)

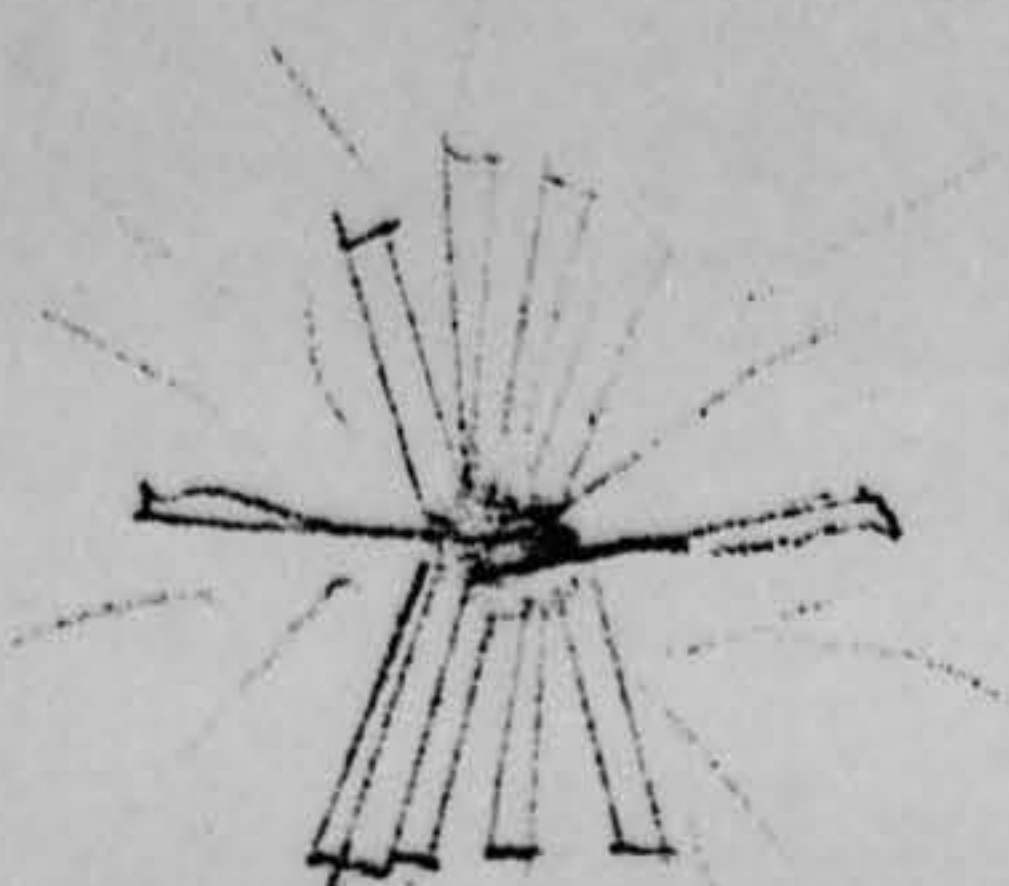

I worked for the Director of Intelligence, 9th Air Force from 1956 to 1958 and have typed some of these reports but never thought I would see such phenomenon myself. However, I felt it my duty to pass it on for whatever it might mean to the Air Force.

Sincerely,

[REDACTED]
(Mrs.) [REDACTED]
